Christian Lobaugh

Software Engineer

SUMMARY

Experienced full-stack software engineer with a passion for building and improving software and software development. Currently focused on building Jamstack solutions which emphasize quality design, usability, accessibility, and performance to create awesome customer experiences on the web.

EXPERIENCE

HireRight, Inc.

Lead Software Engineer: June 2000 - April 2020

- Built new web platform for company's microsites allowing account managers the ability to quickly build and update customer microsites. Reduced time to update site from one month to less than a day. **(Gatsby, React, Sanity.io, HTML, CSS)**

- Built prototype of new web platform for marketing website using content mesh design, increasing load capacity, and improving mobile Lighthouse scores from 23 to 97. **(Gatsby, React, Sanity.io, HTML, CSS)**

- Led team that migrated marketing website with 1,000,000 views per month from on-premise data center to AWS Cloud, allowing the shutdown of 10 servers, while increasing security, increasing load capacity 50%, and lowering costs by > 60%. **(Linux, MySql, Apache, AWS)**

- Led team that was part of a cross-functional project to redesign and develop our web ordering system, decreasing order turnaround time 300%, and increasing order capacity > 500%. **(C#, HTML, CSS, JavaScript, MS SQL, XML, XSLT)**

- Rebranded marketing website with new company branding strategy and improving accessibility. **(HTML, CSS, JavaScript, JQuery, a11y)**

- Refactored report viewing web page, decreasing average load time from 25 seconds to 2 sec. **(C#, HTML, CSS, JavaScript, MS SQL, XML, XSLT)**

- Led team that handled development maintenance and support for diverse backend systems. **(C#, MS SQL Server, Visual Basic, ASP.NET, MVC, Fortran/VMS, Linux)**
